EFFICIENT CONCEPTS FOR AN OPTIMIZED MATERIAL FLOW

From standard conveyors to complete systems, MAX DÖRR GmbH Conveying Systems is your skilled partner.

The functions of our cardboard box and container conveying systems include transportation, accumulation, distribution, sorting, in and output ports as well as buffering.

Thanks to our sophisticated, perfected designs, you can make the most out of our efficient and reliable solutions for your material flow, from incoming goods to commissioning and warehouse management.

With the help of our innovative strength and technical know-how, we are ready to fulfill your individual requests no matter how unique they may be.

WHY CHOOSE MAX DÖRR

USE THE LATEST TECHNOLOGY TO ENSURE PERFECT CONVEYING

As an owner-managed family company spanning three generations, we bring tradition and innovation together. Thanks to 55 years of experience in plant engineering, we are currently a leading supplier of conveying technology solutions for the internal transportation of piece goods.

Whether component production or also the entire project engineering – we are your partner from consulting and planning to design, production and assembly, all the way up to regular system adjustments.

CUSTOM-MADE AND CUSTOMER-SPECIFIC

We provide advice based on your individual needs and manufacture according to specific requests using the latest technology.

LONG-LASTING AND RELIABLE

We are proud to say that our products are MADE IN GERMANY and we hold ourselves to the highest standards, which means you can rely on us to provide you with a long lasting solution.

FLEXIBILITY AND SERVICE-ORIENTED

As a medium-sized family company, we are able to react flexibly whenever the customer needs change, thanks to our modern machinery and our own internal service team.
